PROFESSIONAL PROFILE

Fullstack developer with over three years of experience building real digital products with Django REST Framework, PostgreSQL, React, and Next.js. I integrate functional AI through the Claude API and apply security-by-design principles. Bilingual Spanish/English B2.

TECHNICAL SKILLS

- **Backend**: *Python · Django · Django REST Framework · PostgreSQL · JWT · REST APIs*
- **Frontend**: *Next.js · React · TypeScript · JavaScript · Tailwind CSS · Astro*
- **Security**: *OWASP · MITRE ATT&CK · PTES · Pentesting · Secure development*
- **AI & Tools**: *Claude API · Prompt Engineering · n8n · Git · Linux · Postman · CI/CD*

WORK EXPERIENCE

Lógika | *Frontend Developer & UI Tester Oct 2025 to Dec 2025* · Medellín, Colombia · Remote

- Developed reusable components with React and integrated REST APIs into real products.
- Ran UI and functional tests on Be Kind Network, Newo, and Lógika, documenting over 50 bugs and inconsistencies.

Amazon | *Bilingual Agent Sep 2024 to Feb 2025* · Medellín, Colombia · Remote

- Supported customers in English and Spanish in high-volume environments, developing clear technical communication under pressure.

TECHNICAL PROJECTS

TerraCore [Live] • *terracoreapp.co · app.terracoreapp.co*

Python · Django REST Framework · PostgreSQL · JWT · React · TypeScript · Tailwind CSS

- B2B SaaS to digitize agricultural operations in Colombia, a sector with a critical technology gap.
- **Multitenancy architecture**: each company accesses its data in isolation on a single instance.
- REST API with JWT authentication, role-protected endpoints, and DRF serialization.
- React + TypeScript frontend consuming the in-house API; responsive design with Tailwind CSS.
- **Complex relational modeling**: products, batches, animals, users, and organizations in PostgreSQL.

OKroot [Live] • *okroot.co · app.okroot.co*

Python · Django REST Framework · PostgreSQL · React · Claude API

- PWA for people with dietary restrictions (celiac disease, type 2 diabetes, lactose intolerance).

- **AI-powered nutrition label scanner**: the user photographs a product and Claude analyzes ingredients against their restriction profile.
- Curated recipe system with strict filtering across multiple simultaneous conditions.
- Offline-first consumption log with later synchronization to the backend.
- Persistent health profile that personalizes all model responses.

NullBreach [Live] · *wavival.dev/nullbreach* · *github.com/wavival/nullbreach*

Next.js · TypeScript · NextAuth · Prisma Postgres · OpenAI · Astro

- Fullstack security application with authentication and session management.
- Code-snippet analysis engine against the OWASP Top 10: detects common vulnerabilities such as SQL injection, XSS, hardcoded secrets, and insecure error handling.
- AI chat integrated via OpenAI with persistent conversation context and per-user history in the database.
- Next.js powers the interface, authentication, API routes, and OpenAI integration; NextAuth manages access. Prisma Postgres persists users, queries, and histories.
- Authentication-protected endpoints, with paginated responses and caching of frequent queries. The project's landing page was built with Astro.

Forgotten Portal [Lab] · *github.com/wavival/forgotten-portal-writeup*

Nmap · Gobuster · Netcat · Python · MITRE ATT&CK · PTES · Linux · DockerLabs

- Complete offensive pentesting exercise on a virtual machine in DockerLabs.
- **Phases**: reconnaissance with Nmap and Gobuster, exploitation of an unvalidated PHP upload, reverse shell with Netcat, privilege escalation to root.
- **Vulnerabilities identified and classified**: CWE-615 (information in comments), CWE-434 (unrestricted upload), CWE-312 (cleartext credentials), CWE-321 (hardcoded key), and CWE-269 (excessive privileges).
- Documented using PTES methodology with TTPs mapped to MITRE ATT&CK. Writeup published.
