AI & Tools: OpenAI · OpenClaw · Prompt Engineering · n8n · Git · Linux · Postman · CI/CD

WORK EXPERIENCE

Lógica | Frontend Developer & UI Tester *Oct 2025 to Dec 2025 · Medellín, Colombia · Remote*

- Built reusable components with React and integrated REST APIs into real-world products.
- Ran UI and functional testing on Be Kind Network, Newo, and Lógica, documenting over 50 bugs and inconsistencies.

Amazon | Bilingual Agent *Sep 2024 to Feb 2025 · Medellín, Colombia · Remote*

- Supported customers in English and Spanish in high-volume environments, developing clear technical communication under pressure.

TECHNICAL PROJECTS

TerraCore [Live] | terracoreapp.co · app.terracoreapp.co

Python · Django REST Framework · PostgreSQL · JWT · React · TypeScript · Tailwind CSS

- B2B SaaS for digitizing agricultural operations in Colombia, a sector with a critical technology gap.
- Multitenant architecture: each company accesses its data in isolation on a single instance.
- Modules in development: input inventory with automatic rotation, batch production, animal health, and a real-time dashboard.
- REST API with JWT authentication, role-protected endpoints, and serialization with DRF.
- Frontend in React + TypeScript consuming the in-house API; responsive design with Tailwind CSS.
- Complex relational modeling: products, batches, animals, users, and organizations in PostgreSQL.

NullBreach [Live] | wavival.dev/nullbreach · github.com/wavival/nullbreach

Next.js · TypeScript · NextAuth · Prisma Postgres · OpenAI · Astro

- Security application with OWASP-aligned code analysis and an AI chat powered by OpenAI.
- Next.js combines the interface, authentication, API routes, and OpenAI integration; NextAuth handles access.
- Prisma Postgres persists users, queries, and analyses per user.
- The project landing page remains built with Astro.

OKroot [Live] | okroot.co

Python · Django REST Framework · PostgreSQL · React · Claude API

- PWA for people with dietary restrictions (celiac disease, type 2 diabetes, lactose intolerance).
- AI nutrition-label scanner: users photograph a product and Claude checks its ingredients against their restriction profile.
- Curated recipe system with strict filtering across multiple simultaneous conditions.
- Offline-first consumption diary with later synchronization to the backend.
- Persistent health profile that personalizes model responses.

Forgotten Portal [Lab] | github.com/wavival/forgotten-portal-writeup

Nmap · Gobuster · Netcat · Python · MITRE ATT&CK · PTES · Linux · DockerLabs

- Complete offensive pentesting exercise on a DockerLabs virtual machine.
- Phases: reconnaissance with Nmap and Gobuster, exploitation of an unvalidated PHP upload, reverse shell with Netcat, and privilege escalation to root.
- Identified and classified vulnerabilities: CWE-615, CWE-434, CWE-312, CWE-321, and CWE-269.
- Documented with PTES methodology and TTPs mapped to MITRE ATT&CK. Writeup published.
